Question: How do I turn on VoiceMail Notification to a Cellphone

Answer: Message Notification is turned on and off at the user level station by station as follows:

1. Press Trans/PGM
2. Dial 68
3. Dial 1 (to turn on notification)
4. Save
5. Press Trans/PGM
6. Dial 69
7. Enter the telephone number you wish notified
8. Save

When a voicemail is received for that station, the system will call the notification number. If answered the called party will be allowed to retrieve their voicemail.
